## In-Country Management (Aktau)

*Sergey Kostin (General/Technical Director)*

# Overview of the company

- Operations started in 2008 on the 100% owned licence area (Block 31)
- A total of eight wells have been drilled which resulted in the discovery of three oilfields (Akkar North [East Block], East Akkar and West Zhetybai)
- Next stages of development:
  - Continue domestic oil production on Akkar East, West Zhetybai and Akkar North (East Block)
  - Upgrade East Akkar operation to the Full Field Development stage with access to the required infrastructure to enable the sale of Export Oil
  - Complete final well and reserves report for Akkar East field
  - Continued appraisal of West Zhetybai before completing final reserves report
  - Move Akkar North (East Block) into production phase
  - Update existing reserve base to Final Reserves status
  - Examine exploration extension opportunities to the North East and South East of the existing permit area – provides potential to provide a significant increase to the current reserve base
- Trial Production recommenced in 4Q 2017 – production had been shut in due to the low Kazakh domestic oil price
- Staffing in Aktau increased to handle field operations associated with production recommencing

# Progress from 2008-2018

## EXPLORATION

- 3D seismic data acquired for the entire licence area and surroundings (~235km<sup>2</sup>)
- Eight wells drilled
- Three oilfields discovered
- Currently five wells have approval for Trial Production thru to Dec 2019
- Sixth and seventh wells (J-53 and J-55) will require remedial work/sidetrack to bring them onto production
- Eighth well (J-50) is awaiting TPL approval post recent resolution of the Akkar North (East Block) reserves dispute
- Preliminary State Reserves for the entire licence area currently estimated at **~9 million tonnes / ~64 million barrels of recoverable oil (C1+C2)**

## PRODUCTION

- 2010/11: NIL
- 2011/12: 4,000 tonnes/28,000 barrels
- 2012/13: 28,000 tonnes/195,000 barrels
- 2013/2014: 35,000 tonnes/247,000 barrels
- 2017/2018 (Budget): 35,000 tonnes/247,000 barrels

## APPROVED 2017-2019 WORK PROGRAM

- 4Q 2017/2018: Workovers on 5 wells to bring them all back onto production – 3 wells already back on production
- 2H 2018: Trial Production to resume from J-50 well (Akkar North East Block)
- 2018: 2 new wells - Akkar E (1) and West Zhetybai (1)
- 2019: Remedial work on the J-53 and J-55 wells, further appraisal of West Zhetybai and Final Reserve Report for West Zhetybai

## CORPORATE

- Listed on the ASX and KASE
- 2010: Cornerstone investment from Waterford Group and its partners
- 2011-2013: Continued investment from Waterford Group and other significant shareholders – combined holding grows to ~49% of issued shares
- May and Sept 2013: \$US15.5m in Convertible Notes issued
- Oct 2014: \$US5m Promissory Note (Waterford Group)
- May 2015: Additional \$US5m Promissory Note (Waterford Group)
- June 2016: Additional \$US5m Promissory Note (Waterford Group)
- August 2017: Additional \$US5m Promissory Note

# Table of Contents

1. Overview of the company
2. Reserves, licence area and operational status
3. Current and future development

# Location of the Licence Area

*Total reserves for the Mangistau basin are estimated to be in excess of 5 billion barrels including two large oil fields, Uzen and Zhetybai*

# Reserves and Production Summary

- Five wells drilled: Akkar North – East Block(1) and East Akkar (4), with applications for Trial Production for 3 Akkar East wells (J-51, 52 and #19) approved for the 2017-2019 period.
- Oil production from the 3 Akkar East wells recommenced in 4Q 2017. 4<sup>th</sup> well on field (J-53) requires remedial work/side track. Planned for 2019.
- Production from Akkar North (East Block) J-50 well will resume once TPL approved. Paperwork has been submitted now that there has been resolution of a dispute over Akkar North reserve allocations.
- State Reserves Commission (GKZ) approved preliminary reserves in 2012 of 4.9 million tonnes / 37 million barrels of recoverable oil (C1 and C2 categories) for the Akkar North (East Block) and East Akkar fields
- 2017-2019 Work Program should see Akkar East field progressed to point where it will be ready to move into Production Phase and the sale of Export Oil under a 25 year Production Licence
  
- Three wells drilled at West Zhetybai: Preliminary State Reserves Report approved in June 2014 with C1+C2 reserves estimated at 3.6 million tonnes / ~25 million barrels of recoverable oil.
- Two wells (J-58 and J-59) have applications approved for Trial Production for the 2017-2019 period. Expect these wells to recommence production 2H 2018. 3<sup>rd</sup> well on field (J-55) requires remedial work/side track. Planned for 2019.
- The Company believes there is a significant potential in increasing reserves on West Zhetybai with initial estimates estimating 7.3 million tonnes / 55 million barrels of reserves. More exploration and appraisal wells required to firm up this estimate.

# Licence Details

## BLOCK 31

- Permit issued in December 2006 and acquired by Jupiter in June 2008
- Total area of ~123km<sup>2</sup>
- 3D seismic data obtained over the entire block (~235km<sup>2</sup>)

## EXPLORATION LICENCE

- Thirteen years
- 3 year extension to December 2019 approved in September 2016.

## TRIAL PRODUCTION LICENCES

- Applications approved for five (5) wells to produce under Trial Production Licences (TPL) for the period to Dec 2019.
- Akkar East field has 3 wells and West Zhetybai field has 2 wells
- All oil produced must be sold into the domestic market
- Akkar North (East Block) TPL (J-50 well) TPL has been submitted that now that reserves dispute has been resolved

## PRODUCTION LICENCE

- 25 years for commercial discoveries
- Requires access to an approved production facility to enable 100% gas utilization
- Amended Contract (Jan 2017) specifies a minimum of 65% of oil supplied to the export markets
- Forward plan is to take all three oilfields into Phase 1 of full production as soon as the final reserve reports for each field have been approved and there is access to the requisite infrastructure

# Table of Contents

1. Overview of the company
2. Reserves, licence area and operational status
3. Current and future development

# Current Field Development

# Current Status of Field Development

## Akkar North (East Block) & East Akkar:

- ✓ 5 wells @ 1-2km apart
- ✓ All oil produced from the Triassic (T2B) horizon;
- ✓ Side track being considered for J-53 well
- ✓ T2A and Jurassic has shows in all wells, but the Company has not produced from intervals other than T2B;
- ✓ Appraisal well to be drilled in C2 reserves area before Final Reserves Report to be submitted for approval;
- ✓ Focus will then be on Full Field Development.

## West Zhetybai:

- ✓ 3 wells @ 4km apart;
- ✓ Best performing well is within this area (J-58). Tested at 200 tonnes per day;
- ✓ More testing required on well J-59 at the Triassic. Significant shows at the Jurassic also require further analysis/testing;
- ✓ Side track being considered for J-55 well
- ✓ At least 2 further appraisal wells to be drilled before Final Reserves Report will be submitted for approval.
